

COMPANY PROFILE

we deliver fresh air

Dear Friends,

AFS Company Profile is prepared in the hopes of increasing our brand awareness, ensure sustainability and to inform you, our esteemed partners so that you will be able to learn about our experiences and values.

With 50 years of commercial experience, AFS family has achieved many successes in international platforms. Today, as Europe's largest and World's leading flexible air duct manufacturer, we are proud to bring this success to our country together with our business partners. In its' sector, AFS is the only company that can produce all industrial, commercial and domestic flexible air ducts, under one roof. Therefore, AFS has achieved to become an important supplier for various sectors in the World.

Due to globalization, technology and expectations are changing rapidly. In order to meet and exceed these expectations, our main priorities are R&D, design, production and customer satisfaction. Through analyzing different systems and expectations from different parts of the world, we strive to meet the customers' needs with the right product and combine quality and speed in one common ground.

With its current corporate structure, AFS is committed to its values with its approach to sustainable development. We will uphold the rights of our customers and employees without compromising product quality. We will continue to increase environmental awareness and social responsibility projects.

We owe a debt of gratitude to our colleagues, business partners, customers, suppliers and our friends who have always supported us throughout the years.

Yours faithfully,

Zeki POYRAZ
CEO

motivation for ventilation

timeline

1991

- Began its' production process with semi-flexible air ducts.

2000

- First aluminium flexible air duct was made.
- Istanbul ISK Sodex was attended for the first time.

2004

- Dubai BIG5 was attended for the first time.

- Obtained the Greenguard and Hygiene certificates.
- CONAIR Air Disc Valves and Grills were introduced to the foreign market.

2013

- Won awards for "highest number of countries exported to" and "biggest exporter in the categories of air ducts and air connectors" by the Small and Medium Enterprises Development Organisation.

2015

- All products are A+ certified.

2017

- The first UL 181 Certificate was obtained by AFS for Insulated ducts.
- Turkish HVAC-R Exporters Association Award for the highest number of flexible air ducts exported.

motivation for ventilation

AFS started its production in Ankara in 1991 with semi-flexible air ducts, and towards the 21st century began improving its technology and production in different categories and succeeded as the leader in the HVAC sector. Now, alongside semi-flexible and flexible air ducts, AFS is capable of producing various products that are used in ventilation systems such as industrial hoses, installation and mounting accessories by improving its product quality and variety day after day. AFS has become the biggest producer of flexible air ducts in Europe by expanding its work through its professional employees. As the company took its respected place within the leading companies of the HVAC sector by certifying its products through esteemed laboratories and testing bodies, it continues on the path of becoming the market leader.

Operating with its state of the art technology AFS has a well-deserved pride in its country. Furthermore, exporting to 78 countries through its vision of constant innovation. AFS Always strives to represent the brand “Turkey Discover the Potential”, in the best way possible. Due to its honest, young, dynamic and well-educated workforce, AFS strives to provide effective solutions at the highest possible quality on time. Through its years of experience, AFS knows the different needs of each client around the world. Therefore, providing unique and prompt solutions has become its core principal.

about
us

mission, vision, values

Quality Control

Our organizations' primary objective is to provide quality that is beyond the customers' expectations. In order to ensure its' quality AFS tests its' products throughout the production process, routine tests and measurements are done at AFS Lab. In this sense, AFS keeps close ties with standardization organizations, independent testing organisations and authorities.

Logistics

AFS sets a standard with customs by having the fastest delivery within the world. Through our particular logistics we are able to maximise productivity and minimise costs.

R&D

With the laboratory that it has built, AFS started its' own R&D journey and by renewing its' technology constantly, it aims for unconditional customer satisfaction, hygiene, energy efficiency, silent and impermeable products. Together with the goal to become the best in terms of R&D.

Enviroment

It is the responsibility of all workers, starting from the CEO, to control and prevent all harmful and negative effects that might be caused by the operations of AFS and to always improve energy efficiency. As AFS, it is our duty to educate our employees with the knowledge of occupational health and safety and environmental consciousness for the purposes of "healthy and environmentally conscious production".

Consumer Satisfaction

Consumer satisfaction is the core of AFS' mission. We do our best to provide effective solutions at the highest possible quality on time for our customers. Research is done routinely to receive more information on consumers' needs and wants.
